PART NO XXXXXXX			REVISION 0	SHEET 1/2

NOTE 1 :

Place the 65mm hook on top of the sewn hook on the handle so that a stitch line through the long edge of the new hook will fall on top of the center stitch in the already sewn on hook.

NOTE 3 :
Sew up the edge of the new hook and around it as per the pattern shown. Oversew to be the length of the hook.

NOTE 2 :
Sew the hook in place with a single needle walking foot or equivalent machine using Nylon E-Thread. Thread color is not an issue although a contrasting thread may make identifying those handles already modified an easier task.
